DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Otterbach (US 5,959,766 published Sep. 28, 1999).

With regard to both claims 19 and 25, Otterbach discloses an apparatus operating by the following method:

- inputting a signal light (λ_1 , λ_2) into an optical regenerator (REG);
- shaping a waveform (the Examiner considers amplification to be 'shaping') of the input signal light by the optical regenerator to there by output a shaped signal light (via K2);
- measuring a spectrum shape of said output signal light (via OE1 and OE2);
- controlling a power level of the input signal (STE) in accordance with the measured spectrum shape to improve the measured spectrum shape.

Allowable Subject Matter

3. Claims 2, 8-10, 13, 16-18, 20-24, 26-35, 38-41 are allowed.

4. Claims 36 and 42 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
